Geminihrs.com offers a full end to end Human Resource management system that allows employers to track, deliver, and access relevant data at the click of a mouse. Through a single system, an employer can distribute company documents, benefits, and update payroll records, eliminating double entry and fragmented systems.

Employers can deliver company forms and documents, complete online performance reviews and manage employee recruiting online. Geminihrs.com allows employee self service so employees can update personal records, check leave balances and request time off from any computer. All changes flow seamlessly through the system, ending the need for multiple entries in multiple programs. HR is now seamless, consolidated and at your fingertips.
